

Green Memoir

🍁 Snake Plant

- This insanely low-maintenance plant is an optimal choice for the bedroom because not only does it claim a spot of NASA's list of the top 10 air-purifying plants.
- **It also is one of few houseplants that convert CO2 into O2 at night.**

Rs 480/-

Rs 550/-

🍁 Spider Plant

- Perfect for a hanging planter, and easy to propagate; this plant is effective at fighting a variety of pollutants such as benzene, formaldehyde, carbon monoxide, and xylene.

🍁 Song of India

The song of India plant is used in the clean air study which helps to remove a considerable amount of toxins from the environment.

Apart from its use as the best air cleaner, traditional medicine practitioners of Madagascar have long believed Song of India to cure malarial symptoms, poisoning and diarrhea also.

Rs 550/-

🍁 Succulents

Succulents, are excellent at cleansing the air and removing toxins. NASA's research found that they are able of removing 87 percent of volatile organic compounds (VOC). These plants are extra helpful in library and study environments because VOC substances like Benzene and Formaldehyde are found in rugs, cigarette smoke, grocery bags, books and ink.

Rs 450/-

Rs 900/-

🍁 Dwarf Spider Plant

- The spider plant is one of the most popular indoor houseplants and for offices.
- It's exceptionally easy to care for and has variegated leaves that add a splash of contrast to your home.

🍁 Zamiodulcas Zamifolia (zz)

- A study released by the Department of Plant and Environmental Science from the University of Copenhagen studied a number of indoor plants and found that the ZZ plant was capable of removing significant amounts of Xylene, Toluene, Benzene and Ethylbenzene from the air.

Rs 550/-

Rs 500/-

🍁 Syngonium

- This low-maintenance beauty with its striking forest green leaves is a powerful toxin eliminator and air purifier. It only looks hard to take care of.
- No direct sunlight, allow to dry in between waterings.

🌿 Yucca

- This low-maintenance beauty with its striking forest green leaves is a powerful toxin eliminator and air purifier.
- Water about once every ten days. Perfect for a hanging planter, and easy to propagate

Rs 550/-

Rs 450/-

🍁 Syngonium

- Syngonium Podophyllum , also called Arrowhead plant, or American evergreen, is the most commonly cultivated species of the Syngonium genus.
- Plant care: No direct sunlight, allow to dry in between waterings. Daily misting during the dry winter months, or maintain higher humidity levels in other ways.

🍁 Peace Lily

- Peace lilies produce white flowers in the early summer and continue to bloom throughout the year.
- Keep out of direct sunlight, but in a well-lit area.
- If no flowers are appearing, the plant may not be getting enough light.

Rs 650/-

Rs 850/-

🍁 Rubber Plant

- Provides moisture, eliminates bio effluents, removes volatile organic compounds as well as suppresses air based microorganisms as soon as it's put into a room!
- As time passes, the rubber plant becomes even more efficient at eliminating toxic compounds present in the air.
